

Sporicidin[®] Disinfectant Towelettes

Ready to Use One-Step Disinfectant Towelettes

Description

Sporicidin Disinfectant Towelettes are an EPA registered intermediate level disinfectant for use on environmental surfaces in fitness industries, medical offices, pharmaceutical cleanrooms, compounding pharmacies, prisons, and animal labs where broad-spectrum kill claims and surface compatibility are needed. Sporicidin is based on buffered phenol, sodium phenate, and surfactant blends which help to provide both cleaning and disinfecting activity in one product. Partnered with a strong fabric, these towelettes feature an excellent health and safety profile and provide six months residual activity against odor causing bacteria (if not removed from the surface). Has a mild alkaline pH. No intermediate level disinfectant rotation required if proper protocol is followed.
